

Nicolás Mauricio Montes

Córdoba, Argentina

nicolas.montes@gmail.com

PROFILE

Computer Science graduate with professional experience in AAA game QA and a strong background in C++ development. Seeking a Software Developer position focused on C++, Java, or game development, leveraging a Computer Science degree, professional QA experience, and personal software development projects.

WORK EXPERIENCE

Globant, Córdoba, Argentina

QA Tester

2024– Present

- Tested multiple video game titles, including *Madden NFL 26*, *College Football 26*, and *College Football 27*, spanning the full development cycle, from design documentation through post-release patches.
- Designed and executed regression and exploratory testing based on game design documentation.
- Collaborated with developers to design test cases, as well as reproduce, isolate, and verify defects.
- Developed automation tools using PowerShell and Google Apps Script to streamline internal processes and reduce time spent on repetitive tasks by 30 minutes per day for a team of 16 QA analysts.
- Coordinated teams of 4+ QA testers during regression testing and other client-requested activities.
- Ranked among the team's highest contributors in exploratory testing with 200+ issues reported.

EDUCATION

Universidad Nacional de Córdoba, Córdoba, Argentina

2016–2023

- Bachelor's Degree in Computer Science (5-year equivalent)
- Thesis: Optimization and Parallelization of a Fortran Program

PERSONAL PROJECTS

Portfolio: <https://nickneim.github.io/portfolio>

C++ Puzzle Game Framework – Designed and developed a reusable C++ [framework for turn-based puzzle games](#) with modular gameplay systems and an emphasis on code reuse.

- Separated gameplay logic, rendering, animation, and input into modular subsystems.
- Implemented reusable engine systems including undo, animation, sound, and input management.
- Engineered an input system supporting keyboard, mouse, gamepad, and touch controls.
- **Technologies:** C++20, raylib, CMake, Git, Emscripten, Visual Studio

Puzzle Games – Created several puzzle games using PuzzleScript, focusing on gameplay mechanics, level design, and problem-solving.

Spamaps – Built a JavaScript web application using the Google Maps API for a project by a group of music students. The application analyzes geographic locations and plays music based on the detected environment.

TECHNICAL SKILLS

Languages

C++20, Java, Python, C, JavaScript, SQL, GDScript, Fortran

Tools

Git, CMake, PowerShell, Google Apps Script, Visual Studio

Concepts

Object-Oriented Design, Design Patterns, Data Structures & Algorithms

LANGUAGES

Spanish (Native - C2)

English (Advanced - C1)
